

ReliaG® Pro Series

MODEL 2568

Direct Screw Drive
Garage Door Opener

ALWAYS AT YOUR COMMAND

GENIE
PROFESSIONAL LINE
MODEL 2568

Featuring 1/2 HP Motor

Highlights

- **Durable Performance** – AC motor combined with patented direct screw drive rail provides power for operating residential sectional doors up to 500 lbs. and up to 10' high (8' high for one-piece doors).
- **Maintenance-Free Direct Drive System** – Self-lubricating screw drive rail requires no maintenance under normal operating conditions. The screw drive steel rod connects directly to the motor, eliminating the need for a gearbox normally used on chain or belt models (fewer parts mean less chance of a breakdown in the future).
- **Assembled in the U.S.A.**
- **Dependability** – The quality built into a Model 2568 is backed by a 15-year Limited Warranty[◇] for the motor and Limited Lifetime Warranty for the screw drive rail.
- **Smart Illumination Lighting** – The 2-bulb system positions the light toward the inside of the garage instead of on the door for light where you need it most.

THE GENIE STORY: Genie has a rich history in developing garage door openers that feature reliability, strength, safety, security, and convenience. Since 1954, Genie has produced millions of openers that serve millions of satisfied homeowners every day of every year. Shouldn't you have one in your garage?
Genie — Always at Your Command!

[◇] Limited non-transferable warranty. See Operation & Maintenance manual for details.

Features & Benefits

POWER & CONTROL

AC Motor – The AC motor provides all the power needed to deliver top performance for opening and closing your garage door when you need it.

Screw Drive Design – Patented direct screw drive rail offers strong lifting force. This design also increases reliability by eliminating the gearbox necessary for belt and chain models. Fewer parts mean less chance for potential breakdown in the future.

C-Channel Rail – Strong rail design helps promote durability and safety. Also conceals the screw drive rod for better appearance.

Speed – The powerhead has an opening speed of 7.0 inches/second* to get you on your way fast.

SAFETY

Safe-T-Beam® Non-Contact Reversing System – When objects pass through the infrared beam, the garage door automatically stops closing and reverses open without having to make physical contact with the door.

SECURITY

Intellicode® Access Security System – Genie's superior encryption technology prevents piracy of the radio signal that operates your door by always selecting a new code from billions of combinations each time the opener is operated.

Sure-Lock™ Control – Allows you to lock out remote controls and wireless keypad at any time for increased security – also known as a vacation lock.

CONVENIENCE

Smart Illumination – Light bulbs are positioned toward inside of garage instead of toward door for light where it's needed most. Lights stay on for 4 minutes once opener is activated for ample time to get into house. Opener uses incandescent (60-watt max per bulb) or most LED and CFL bulbs. (See Genie LED bulb this page for additional option.)

Auto Seek Dual Frequency – The internal system automatically uses either the 315 or 390 MHz frequency produced by the remote control or keypad to help ensure the opener responds regardless of potential nearby frequency interference, such as military base equipment.

Pre-Programmed Remote – Ready to use out-of-the-box with simple steps to change the programming if so desired.

HomeLink® & Car2U® Compatibility – Works with current and ALL previous versions of HomeLink or Car2U.

6' Power Cord (Model 2568H) – Upgrade from standard 4' power cord.

Convenience Features

Genie® Garage Door Opener LED Bulb - NEW!

Common LED and CFL bulbs can emit interference to limit the range of garage door remotes. Incandescent light bulbs can have their lives shortened by vibration associated with opener operation. The Genie LED bulb solves these and other problems to ensure the garage door opener light doesn't leave your garage in the dark!

Aladdin Connect™ Garage Door Controller

Gives ability to remotely monitor and change the position of your garage door from almost any smart device. The controller provides security and convenience. You'll be able to know when someone is operating your door, or close it if your door status shows you left it open. You can even open it for a relative, babysitter, delivery, or repair person. Up to 3 doors can be monitored and 20 users added with one system.

Wireless Keypad

Mounts outside your door to give you keypad code access to your garage. Back-lit keypad lets you easily see the numbers. Controls up to 3 openers.

Choose a color for the flip-up cover that best complements your home.

1-Button Remote

If the remote only needs to operate one opener, you may want our simple, easy-to-use one-button remote. Also features Auto Seek Dual Frequency just as the standard 3-button remote does.

GenieMaster® Remote

This versatile remote control works with all Genie gated community receivers as well as most Genie openers ever made, including Genie 390 MHz remotes on 9-switch, 12-switch, and 9-switch trinary formats. It also is compatible with those models that have Auto Seek Dual Frequency.

YOUR GENIE PROFESSIONAL DEALER:

* +/- 0.5 inches per second. Speed will slow with one-piece doors.
¹ Limited non-transferable warranty. See Operation & Maintenance manual for details.
