

ReliaG® Pro Series

MODEL 3020

Garage Door Opener
Belt or Chain Drive

 Battery Backup Capable

ALWAYS AT YOUR COMMAND

Highlights

- **Durable, reliable performance** – The strong DC motor operates most properly balanced residential sectional doors up to 10' high and 500 pounds. Model 3020 has an opening speed of 7.0" per second*.
- **Battery Backup Capable** – No more unexpectedly getting locked outside the garage when the power goes out! The battery unit can easily be added to your opener if you so choose.
- **Soft Start & Stop Control** – DC technology allows your door to begin and end its movement smoothly instead of abruptly whenever you operate it, creating less noise and less wear on the door.
- **6' power cord** – While most openers come with a 4' power cord, the Model 3020 cord is 6' in length to compensate for outlets that require longer reach.
- **Dependability** – The quality built into a Model 3020 is backed by a 15-year Limited Warranty^o for the motor and 15 years for the belt drive rail (5 years for the chain drive rail).
- **Smart Lighting** – The Model 3020 comes with lighting on each side of the powerhead to help spread light around the entire garage.
- **GenieSense™ Monitoring** – Automatic force profiling and diagnostic technology improves safety by stopping operation when significant changes occur.

THE GENIE STORY: Genie has a rich history in developing garage door openers that feature reliability, strength, safety, security, and convenience. Since 1954, Genie has produced millions of openers that serve millions of satisfied homeowners every day of every year. Shouldn't you have one in your garage? Genie — Always at Your Command!

* +/- 0.5" per second
^o Limited non-transferable warranty. See Operation & Maintenance manual for details.

Convenience Options

Features & Benefits

POWER & CONTROL

DC Motor Smart Technology – The DC motor offers quiet performance and gives the ability to integrate Soft Start & Stop control. This means the door begins and ends its travel smoothly instead of abruptly, helping to lessen noise with the added benefit of less wear and tear on your garage door.

C-Channel Rail – Strong rail design helps promote durability and safety. Also conceals the belt (or chain) for better appearance.

Belt or Chain Drive – Choose the belt drive option for quieter operation or chain drive for economical value.

SAFETY

Safe-T-Beam[®] Non-Contact Reversing System – When objects pass through the infrared beam, the garage door automatically stops closing and reverses open without having to make physical contact with the door.

SECURITY

Intellicode[®] Access Security System – Genie's superior encryption technology prevents piracy of the radio signal that operates your door by always selecting a new code from billions of combinations each time the opener is operated.

Sure-Lock[™] Control – Allows you to lock out remote controls and wireless keypad at any time for increased security – also known as a vacation lock.

Battery Backup Capable – Add the battery backup option for extra security in case of temporary power loss, allowing you to enter the garage without having to leave your vehicle to open the door.

CONVENIENCE

Smart Lighting – One light bulb is positioned to each side of the powerhead to help light the entire garage. Both lights stay on for 4 minutes once opener is activated for ample time to get into house. Opener uses incandescent (60 watts max per bulb) or most LED and CFL bulbs. (See Genie LED bulb this page for additional option.)

Auto Seek Dual Frequency – The internal system automatically uses either the 315 or 390 MHz frequency produced by the remote control or keypad to help ensure the opener responds regardless of potential nearby frequency interference, such as military base equipment.

Pre-Programmed Remote – Ready to use out-of-the-box with simple steps to change the programming if so desired.

HomeLink[®] & Car2U[®] Compatible – Works with current & ALL previous versions of HomeLink[®] or Car2U[®]. No additional external repeater kit or compatibility bridge needed.

6' Power Cord – For hard to reach outlets.

Genie[®] Garage Door Opener LED Bulb - NEW!

Common LED and CFL bulbs can emit interference to limit the range of garage door remotes. Incandescent light bulbs can have their lives shortened by vibration associated with opener operation. The Genie LED bulb solves these and other problems to ensure the garage door opener light doesn't leave your garage in the dark!

Aladdin Connect[™] Garage Door Controller

Gives ability to remotely monitor and change the position of your garage door from almost any smart device. The controller provides security and convenience. You'll be able to know when someone is operating your door, or close it if your door status shows you left it open. You can even open it for a relative, babysitter, delivery, or repair person. Up to 3 doors can be monitored and 20 users added with one system.

Wireless Keypad

Mounts outside your door to give you keypad code access to your garage. Back-lit keypad lets you easily see the numbers. Controls up to 3 openers.

Choose a color for the flip-up cover that best complements your home.

Battery Backup

Add this option, and when the power goes out, Genie battery backup power goes on so you don't have to manually open and close the garage door!

1-Button Remote

If the remote only needs to operate one opener, you may want our simple, easy-to-use one-button remote. Also features Auto Seek Dual Frequency just as the standard 3-button remote does.

GenieMaster[®] Remote

This versatile remote control works with all Genie gated community receivers as well as most Genie openers ever made, including Genie 390 MHz remotes on 9-switch, 12-switch, and 9-switch trinary formats. It also is compatible with those models that have Auto Seek Dual Frequency.
